PROFESSIONAL SUMMARY

Detail-oriented and analytically minded Computer Science graduate with hands-on experience in data cleaning, data formatting, visualization, and dashboard creation using Excel, Power BI, Tableau, and Python. Skilled in writing efficient SQL queries, creating DAX measures, and building clear, actionable reports. Strong problem-solving ability with a passion for turning raw data into meaningful business insights.

EDUCATION

Bachelor of Computer Science Graduating 2026
Deogiri College, Chhatrapati Sambhajinagar
CGPA: 7.24

TECHNICAL SKILLS

Data Analysis & Visualization: Excel, MySQL, Power BI, Tableau, Python (Pandas, NumPy, Matplotlib, Seaborn)

Core Competencies: Data Cleaning, Data Formatting, Data Transformation, Data Visualization, Exploratory Data Analysis (EDA), Dashboard Creation, DAX, Basic Statistics

SQL: SQL Joins, Subqueries, Aggregation, Reporting

Tools & Platforms: Jupyter Notebook, Microsoft Excel, MySQL, Power BI, Visual Studio Code (VS Code), Git & GitHub

Soft Skills: Problem Solving, Analytical Thinking

PROJECTS

PhonePe Analysis Project Power BI | DAX

- Cleaned raw PhonePe data by removing duplicates, handling missing values, and correcting inconsistencies.
- Formatted and transformed the data (data types, columns, and structure) to make it analysis ready.
- Visualized the data through interactive charts and dashboards to highlight trends and key insights.
- Created DAX measures to calculate key metrics and support data-driven decisions.

CERTIFICATIONS

Data Analyst Course - Simplilearn SkillUP 27 September 2026
Certificate of Completion | Certificate Code: 10796360

Data Analytics Job Simulation - Deloitte (via Forage) 24 September 2026
Certificate of Completion | Practical tasks in Data Analysis and Forensic Technology

AREAS OF PRACTICE

- Cleaning, formatting, and transforming raw datasets to ensure accuracy and consistency for analysis.
- Performing Exploratory Data Analysis (EDA) using Python (Pandas, NumPy, Matplotlib, Seaborn) to uncover trends and patterns.
- Writing SQL queries involving joins, subqueries, and aggregations to extract and summarize data from relational databases.
- Designing interactive dashboards and reports in Power BI and Tableau using DAX for calculated metrics.
- Building clear, insight-driven visual reports to support data-based decision making.

LANGUAGES

English, Hindi, Marathi
